GET READY FOR A GREAT EXPERIENCE

Whether you are paddling, windsurfing or want to best of both sports. At STX we are dedicated to deliver the best package in the world. Get ready for your personal adventure, get ready for a great experience.

Reliability, Rigid and build with the best components in the market. STX combines careful attention to detail and superior technology.

THE STX PROMISE; ACCESSIBLE QUALITY

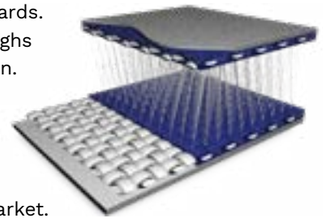
At STX we strive to make the sports we are passionate about, accessible. Premium quality products are sourced from the world's leading suppliers, offering a simple, yet aesthetically pleasing range that caters to every level, including inflatable SUPs, packable windsurfing rigs, kids' and school rigs, composite and alloy paddles, windsurfing masts, windsurfing booms and other great accessories. Our dedication has ensured continued, steady growth on every continent. STX, accessible for all.

WHAT WE OFFER IN 2022

FXL

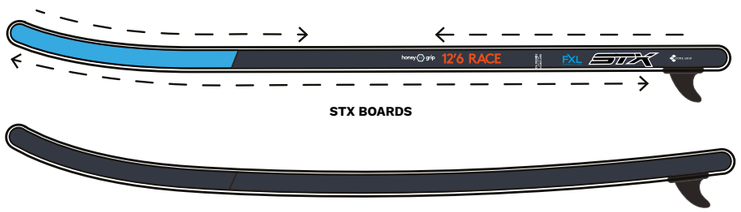
Feather light construction

Fusion Double Layer, X light construction. Exclusive on STX boards. The lightest inflatable boards on the market. Woven fabric weighs less. It prevents the material to stretch and holds more tension.



STIFF, STIFF, STIFFER

A stiff board transfers the power into fastness, not into bending. Woven fabric weight stretch diagonal hold more tension. Your STX board is one of the stiffest boards on the market.



PSI

Although we recommend 15 PSI, every single FXL made board can be inflated beyond 20 PSI. Again another advantage of our FXL technology.

STRENGTH

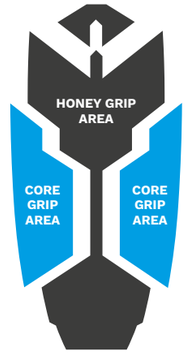
Tensile strength test show a 50% improvement on Fusion DL. Tearing strength shows even a 100% increase on Fusion DL.

DOUBLE LAYER

STX boards are made to last. Double layer bottom and deck, double layer rails and the best components on the market today.

PREMIUM DETAILS

- HONEYGRIP; smooth, grippy, maximum comfort and strong our well know EVA deckpad
- CORE GRIP; stance area gripdeck with increased grip worked into the EVA
- KICKPAD; all pure SUP inflatables boards have a kickpad for increased grip, steering and control
- Stainless steel D-rings for docking the boards, for a strong connection with anything you wish
- Storage bungee for your bag on all SUP boards
- High pressure valves. Up to 20 PSI, preferred 15 PSI
- Double layer, fusion, deck and bottom
- Premium air valves
- Ergonomic Neoprene Grab Handle



DETAILED ACCESSORIES

- STX pump with fold up stands and vario handles to minimize size and packaging
- STX AIR travel packpack with space for pump, board, paddle and the standard repairkit

QUALITY

Our boards are made in **FXL, FUSION XTRA LIGHT** construction. Tough and every inch of the board is glued with precision, made by a selected and experienced production team.

Our boards are made in **FXL, FUSION XTRA LIGHT** construction. Tough and every inch of the board is glued with precision, made by a selected and experienced production team.

Smooth, extra grippy, maximum comfort and strong our well know EVA deckpad. Dual Density.

Smooth, grippy, maximum comfort and strong our well know EVA deckpad. Kickpad for easy turning.

LINE OVERVIEW

CRUISER
Stable boards with a wide outline. The perfect compromise between speed & stability.

FREERIDE
Standup paddling in every condition.

TOURER
Streamlined arrow shaped board for higher speeds, faster paddling and longer distances.

RACE
Arrow shaped boards for higher speeds and faster paddling.

ART.NR. - COLOR	407.02081.000 - Black/Silver
PADDLE	High level performance for an affordable price
WEIGHT	0,65KG

CAM LOCK ADJUSTABLE

Our camlock can be tensionized to your personal preference. Provides high grip and minimizes movement of the shaft and extension.

SHAFT

The best Prepreg Carbon construction for max stiffness and flex.

PUSH PIN +CAM LOCK ADJ.

DFS, double function system. The push pin sets the paddle in line and reduces the torsion while the second camlock grips this connection tightly. Our camlock can be tensionized to your personal preference. Provides high grip and minimizes movement of the shaft and extension.

BLADE

Our paddle's shape helps you propelling the board faster through the water.

HYBRID SUP/KAYAK

PADDLE

- 4 piece
- Easy adjustable
- Cam Lock adjustable
- Nylon blades

ART.NR. - COLOR	407.02100.000 - Black/Blue/Orange

101

The right RIG setup is an important step if you want to windsurf like a pro.

Your skill level, height and the conditions you want to use the sail in (mostly wind strength) are factors. Beginners should go for a smaller sail, relative to their height (ask instore). Check out our website for more info on choosing the right gear.

READY TO GO

MINIKID

For the first steps in windsurfing or great family weekends. Available in 2 nice color combinations. Light, easy to pack, easy to rig and made out of high quality monofilm with glass battens. A vario 2 piece alloy mast and a easy to mount boom. Uphail, ropeset and a trim adapter come with the package. The rig is packed in an easy to go bag which fits the complete rig.

A QUICK GUIDE

The correct mast is all too often overlooked when choosing gear.

At the outset, there are a few great features that all **STX** mast models share. An **XCORE Wrap** on the base of all our masts prevents long term wear and scratches. Another big plus is the **STX Boom Height** indicator.

As any pro worth their salt will attest, several core factors can affect a mast's overall performance. Even if it's paired with the best sail money can buy, this piece of gear should match your **specific riding style and expectations.**

Here's where science comes in. Through some sharp R&D at **STX**, we've refined the ratios of carbon to fibreglass in all our masts. In a nutshell, Carbon percentages translate to critical factors like **Reflex Speed, Durability, Stiffness and Weight.** These factors all pair off against each other to produce varying results that cater to different riders' needs.

Don't fret though - it's not as complicated as it sounds. Check out our simple comparitive **diagrams and tables alongside** to see how **STX** models compare to each other.

At the end of the day, all **STX** masts perform brilliantly and look as good as they perform, so you can't really go wrong.
