# CONTENTS

# A REVOLUTIONARY MOMENT IN THE WETSUIT INDUSTRY

Prolimit stands as a leader in the manufacture of wetsuits, harnesses, and accessories, merging quality with innovation and a product-driven marketing approach. Our top priority is crafting products that meet your needs.

As an overview, here are some of our exciting new design and innovations we've been working on sharing with you: We are entering a new era in wetsuit design with our NaturePrene 2 range, a 100% neoprene-free collection. These wetsuits are made from rubber sourced from FSC-certified plantations and enhanced with oystershell and soybean oil. Combined with our superior fit, flexibility, and four-layered Thermal Rebound technology, NaturePrene 2 sets a new standard.

Our 2025 wetsuit collection is CE approved and tested for above-surface watersports, making us the first wind wetsuit supplier to offer 100% neoprene-free wetsuits with CE certification.

In 2025, we're also introducing our patented Slider Wheels, perfect for travel board bags. These wheels make transporting your board bag effortless and can be easily mounted to any slider base.

ATOM, our next innovation, exemplifies our product-driven approach. This new harness and bar system integrates a safety release, quick release, and lever tensioning system into one unique design made from molded stainless steel, offering unparalleled strength.

It's going to be an exciting year, and remember, we've got you covered!

## PROLIMIT

WETSUITS

100% NEOPRENE FREE WETSUITS,  
FSC CERTIFIED & CE APPROVED

# WE'VE CRACKED THE CODE

We've cracked the code to produce the world's first **100% neoprene-free wetsuit that doesn't compromise on stretch, warmth, or strength.**

From our 2024 fall collection onwards, all Prolimit wetsuits will be 100% neoprene free and FSC approved.

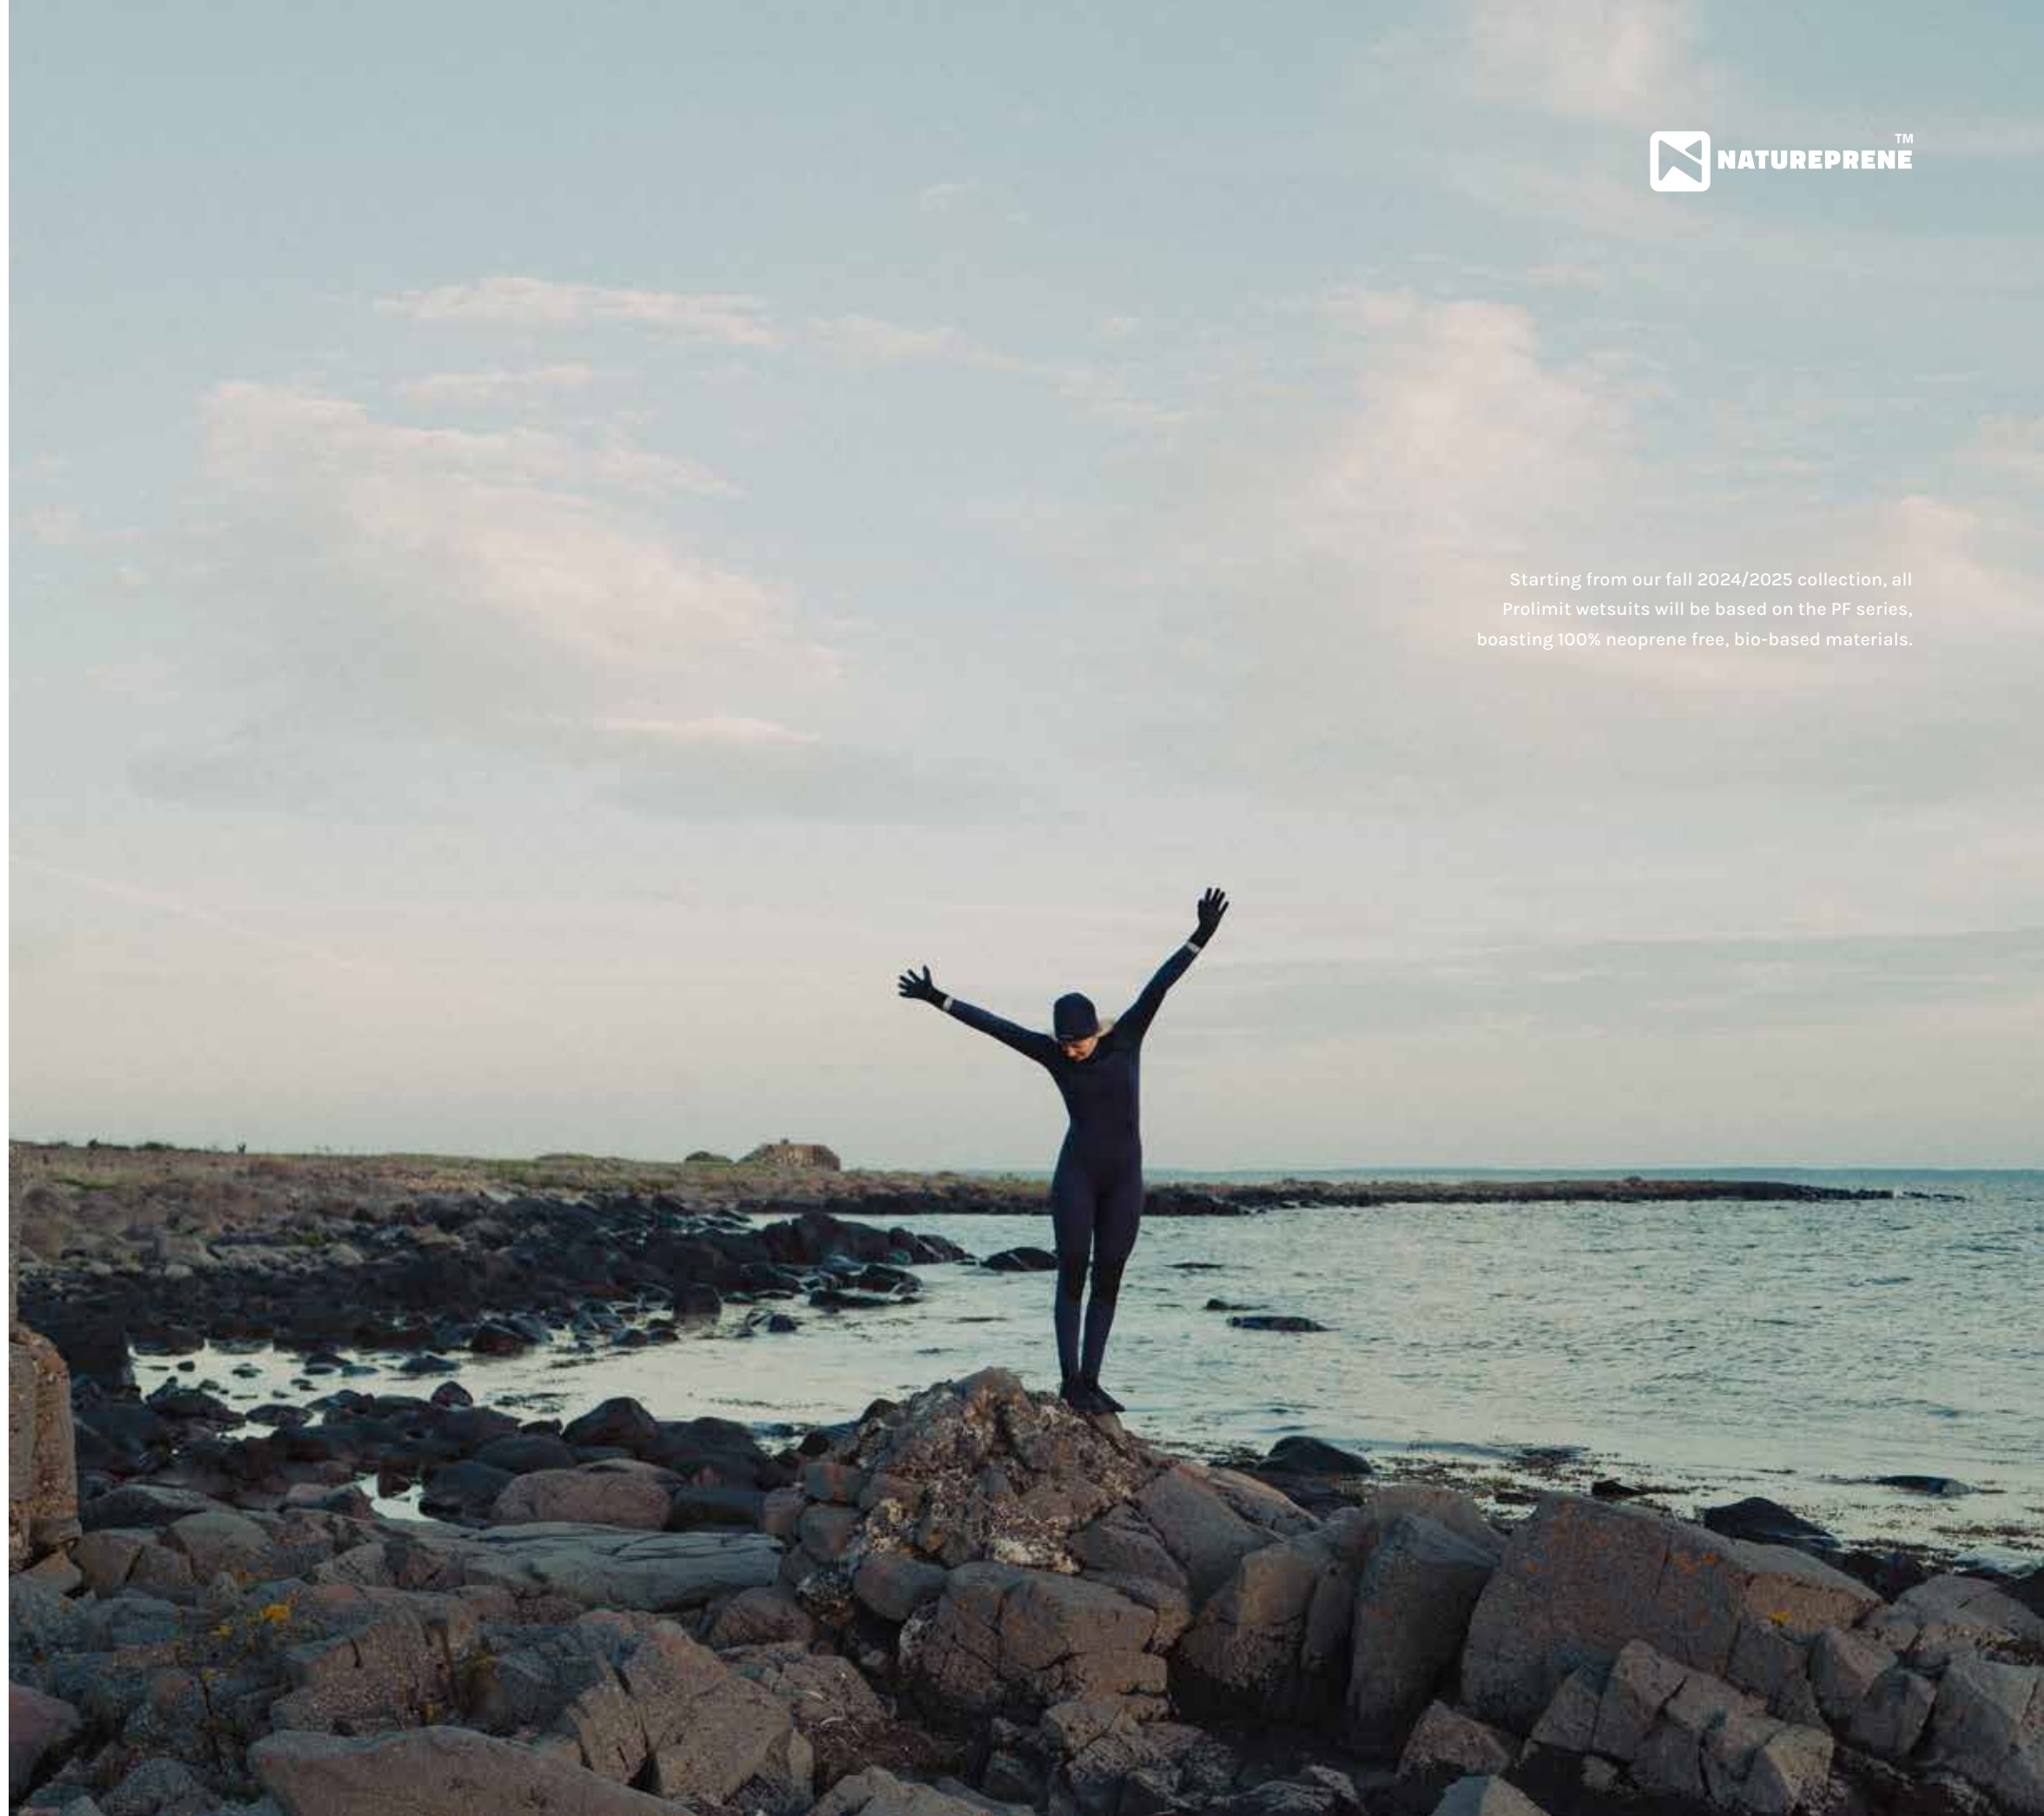

A decade ago, Prolimit pioneered the development of wetsuits with NaturePrene, leading to the groundbreaking PF series. The Prolimit Future series set the stage for a sustainable future. Today, with the expertise gained from PF-1, PF-2 and now our PF-3 series, we proudly introduce NaturePrene2® – a biobased, FSC-certified material.

With innovation at the forefront of our mission, we've continuously pushed boundaries in wetsuit design. From introducing the first Front zip wetsuits to developing the unique 4-Layer Thermal Rebound technology, our commitment to innovation remains unwavering.

The transition to even more sustainable wetsuits, free from neoprene, marks an exciting step forward for Prolimit. We are proud to deliver world-class, high-quality wetsuits utilizing a technology that is now spread entirely across our full range of wetsuits.

Known for our product-driven approach, we are dedicated to finding the best natural components for our wetsuits. Our commitment to sustainability doesn't end here – we are constantly striving to improve.

Starting from our fall 2024/2025 collection, all Prolimit wetsuits will be based on the PF series, boasting 100% neoprene free, bio-based materials.

The aim is clear:  
to reduce the carbon footprint while  
delivering top-notch performance.

We are committed to reducing our carbon footprint and prioritizing eco-friendliness in our products. That's why we utilize specially recycled, eco-friendly raw materials whenever possible and employ innovative techniques to minimize impact on the environment.

NaturePrene2® material is biobased rubber derived from rubber trees and is FSC certified. With NaturePrene2®, you'll experience the same stretch, warmth, insulation, and durability as our current lineup, without compromising on costs. The journey doesn't end there! Our design team is already setting their sights on the future, aiming to develop waste-free wetsuits by 2026.

→ Join us on this exciting journey towards sustainability and performance. Every dive is a step towards a brighter future with Prolimit NaturePrene.

## A FEW FIGURES

# 119 liters

of water are saved per wetsuit during dyeing process

This is

# -91%

water than normal dyeing process

## TIMELINE DEVELOPMENT EVOLUTION

### 2017

#### Prolimit Eco suit

Prolimit's first wetsuit featuring a more sustainable type of neoprene, Yulex plant-based neoprene, derived from the guayule plant. This plant is a sustainable resource, requiring minimal water and thriving in dry regions unsuitable for other crops. Utilizing this plant-based source, Prolimit was able to significantly reduce environmental effects (saving 2.0 kg of CO2 per wetsuit). Additionally, Yulex neoprene meets the performance characteristics of traditional neoprene, offering flexibility, durability, and insulation.

### 2018/2019

#### NaturePrene 1 introduced

Prolimit introduced NaturePrene 1 and achieved official FSC (Forest Stewardship Council) approval and certification, recognizing the reduced environmental impact. While working on our rubber materials we started to explore making the outerlining of recycled Polyester yarn which are undergoing a dope dyeing process saving 90% water. At the same time we introduced compostable packaging on all of our wetsuits. Using waterbased ink for printing, using natural colors, and with the solventfree waterbased glues for our lining.

### 2020

#### PF-1 series introduced

Introducing a full series of wetsuits using the FSC approved NaturePrene 1.

All of our lessons learned came together in the first PROLIMIT FUTURE SERIES wetsuit. A 100% sustainable wetsuits. Combining natural rubber, PE bottles inner lining, recycled polyester outer lining, in a compostable packaging. Being an industry leading brand launching these on the market was a big step in neoprene development.

### 2022

#### PF-2 series introduced

For the PF-2 series the Natureprene was further improved to enhance softness and flexibility/stretch.

The next big steps were weight, flexibility and freedom of movement which became noticeably better on the PF-2 series. Maintaining the recycled PE Bottle lining with the Recycled Polyester outer lining. We also combined the waterbased glues on all areas including seams and lining.

### 2024/2025

#### NaturePrene 2 introduced to the entire range

NaturePrene 2 is now used across the entire range of Prolimit products, significantly enhancing sustainability and greatly reducing our environmental footprint. Additionally, this year, Prolimit wetsuits have achieved official CE approval, indicating compliance with European safety, health, and environmental protection standards.

For the PF 3 wetsuit series, a new material was introduced made from Rubber tree-based neoprene, which is made from natural rubber sourced from rubber trees. These trees can be tapped for latex without being cut down, making it a sustainable option. Therefore, making it a continuous supply of raw material without deforestation.

Rubber tree-based neoprene retains the essential properties of traditional neoprene, including flexibility and elasticity, making it suitable for applications requiring stretch and durability. It provides good insulation, maintaining warmth in wetsuits and other protective gear.

## THE BENEFITS OF NATUREPRENE2®

- 100% neoprene free materials
- FSC certified
- Green manufacturing process
- Oyster shell powder
- Soybean oil
- PAH, ROHS and reach compliant
- Eco carbon black
- Water-based glue

More about these words →

## SO WHAT IS WHAT?

### 100% NEOPRENE FREE MATERIALS

From Petrol chemicals base to Limestone neoprene (mining mountains) to NaturePrene and now introducing NaturePrene 2 completely made with Natural Rubber harvested from FSC certified rubber tree plantations. USDA-certified and 80% natural rubber, 20% recycled carbon black and enriched with Oystershell powder and Soybean oil.

### OYSTER SHELL POWDER

Harvested from scrap oystershell washed ashore the powder is an important enriching component for the blend in our NaturePrene 2 rubber.

### SOYBEAN OIL

One of the components to create NaturePrene2, the Soybean oil is edible oil extracted from soybean seeds. This is a 100% plantbased oil.

### DOPE DYED YARNS

Before lamination we need to prepare lining fabrics. Prolimit uses the dope-dyeing process. This means that we don't dye the fabric in our production process anymore. The traditional way of coloring has a high water consumption, using a lot of energy and producing a large amount of industrial waste water and toxic chemicals. Instead of the traditional and common way, we use the method of dope dyed yarns. Dope dyeing is an energy saving and a more environmental-friendly method. Dope dyed yarns are made by adding colorant to the polymer melt in spinning.

In short, we add the color before spinning. With this procedure in which we color the yarn without the dyeing process, we save 104L of water per kg of fabric. The advantages of dope dyeing are in line with our goal to produce products with respect for our planet.

### FSC CERTIFIED

The Forest Stewardship Council monitors and confirms that specific forest areas are being managed inline with the FSC principles and criteria.

### PAH, ROHS AND REACH COMPLIANT

Our wetsuits are PAH (Polycyclic Aromatic Hydrocarbons) free and 100% reach compliant. Reach compliant means we have achieved to ban the use of extender oils in our neoprene sheets for a better environment. REACH is a regulation of the European Union, adopted to improve the protection of human health and the environment from risks that can be posed by chemicals in the production process.

The PAH neutral neoprene has improved characteristics such as weight and stretch, and it also prevents skin irritation. We banned the use of extender oils in our neoprene which is better for your skin and nature.

### WATER BASED GLUE

The laminated neoprene sheets are cut into panels and put together to create a neoprene product such as a wetsuit. The lamination of all our wetsuits is done with water based glue, so called aqua-a. Unlike the traditional glue, the water based glue is solvent free and without chemicals (it removes 99% of the impurities). This avoids latex allergies. Don't worry! Of course the glue will not dissolve in water. We made sure that the glue is as strong as the traditional glue.

### ECO CARBON BLACK

Carbon Black is a key ingredient to produce neoprene. Our eco carbon black is made from recycled tires. The tires are shredded and thereafter transformed into powdered carbon black. Unlike the traditional carbon black, this method reduces the energy consumption and the CO2 emission by 200g per wetsuit.

## NEOPRENE AND CONSTRUCTION TECHNOLOGY

### V4X FABRIC

A new generation of fabric. With a unique appearance, irresistible looks and used on our highend Vapor wetsuits. Isotropic stretch characteristics in combination with Airflex2 lining, ThermalR and Zodiac2 lining are giving the Vapor unbeatable stretch, durability, warmth and a unique look.

### FTM TAPED SEAMS

Our Fluid Taping Method seam construction. Triple glued seams with the outside of the seam sealed of by a wider black carbon neoprene seal. The inside of the seam is protected by our glued and blind stitched technology. FTM taped seams are durable, watertight and keep their high stretch.

### NEOLIGHT HEATHER 550+

The heather fabric ads the luxury look on our Mercury and OxyGen wetsuits. Besides looks the extra yarns offer a softer, more stretch and a smooth feel to the outer lining. The two tone colorscheme also indicates the areas in which the unique TR lining is used. Now in combination with our velvet feel Airflex2 inner lining and Thermal Rebound triple layering. Nasa technology incorporated.

### GLUED AND BLINDSTITCHED SEAMS WATER BASED GLUE

Triple glued panels are stitched together with a special stitching method. Partially puncturing the neoprene to keep the water tightness of the wetsuit seam. Each thread is protected by a tape at the end. Our perfect finish makes our glued and blind stitched wetsuit indestructible. Precise seam and material placement for a tailored fit. Designed to fit your body without over-stretching the neoprene, which prevents stretched out thin neoprene and loss of thermal insulation.

### DOWN AIRFLEX

Our Down AirFlex fabric, water repellent and dry wicking with the feel of down and the maximum stretch of our airflex neoprene on our Predator and Flare wetsuits. Softfeel and in combination with the Velvet AirFlex2 lining a unique material.

### FLATLOCKED SEAMS

Flatlock stitching involves laying one panel against the other, then stitching though the neoprene. The resulting seam is flexible and strong but not watertight. This makes it more suited to summer or warmer water surfing.

PROLIMIT

 NATUREPRENE™

## WETSUIT INSIDE TECHNOLOGY

### 3 LAYER

#### VELVET AIRFLEX 550+ & 500+ LINING

Softer than ever before, more stretch, comfortable feel and quickdry. Another milestone in wetsuit technology. Clearly recognizable because of the feel... smooth as velvet.

#### ZODIAC2 LINING

Zodic Jacquard velvet fleece on the inside, layered with a quick dry thermal fleece for more warmth and comfort. It absorbs the water from the skin, releases quickly and increases comfort.

## THERMAL REBOUND™

### 4 LAYER

Thermal Rebound™ lining is directly derived from survival blankets for the protection against cold conditions. Extra protected layer between the neoprene and zodiac to reflect your body heat and to block wind chill. Keeping you comfortable, dry and light. This technology goes back to the mid 1970's where NASA developed the thermal blankets for their manned missions into space as insulation.

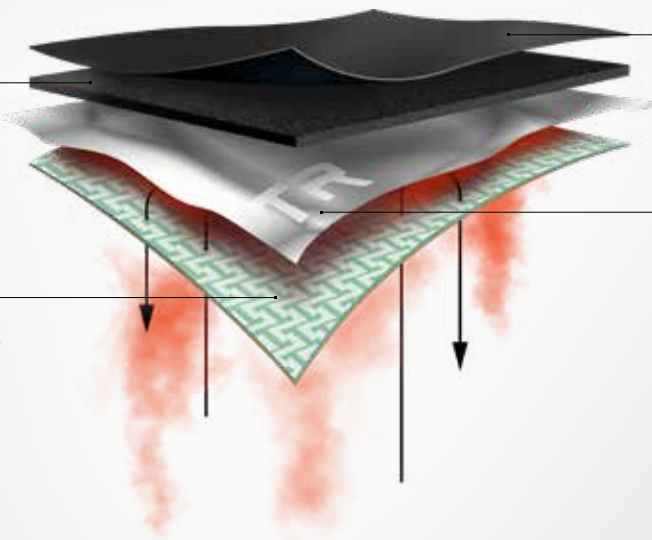

#### NATUREPRENE

Provides insulation and unrestricted movement

#### ZODIAC2 LINING

A quick dry thermal fleece for more warmth and comfort

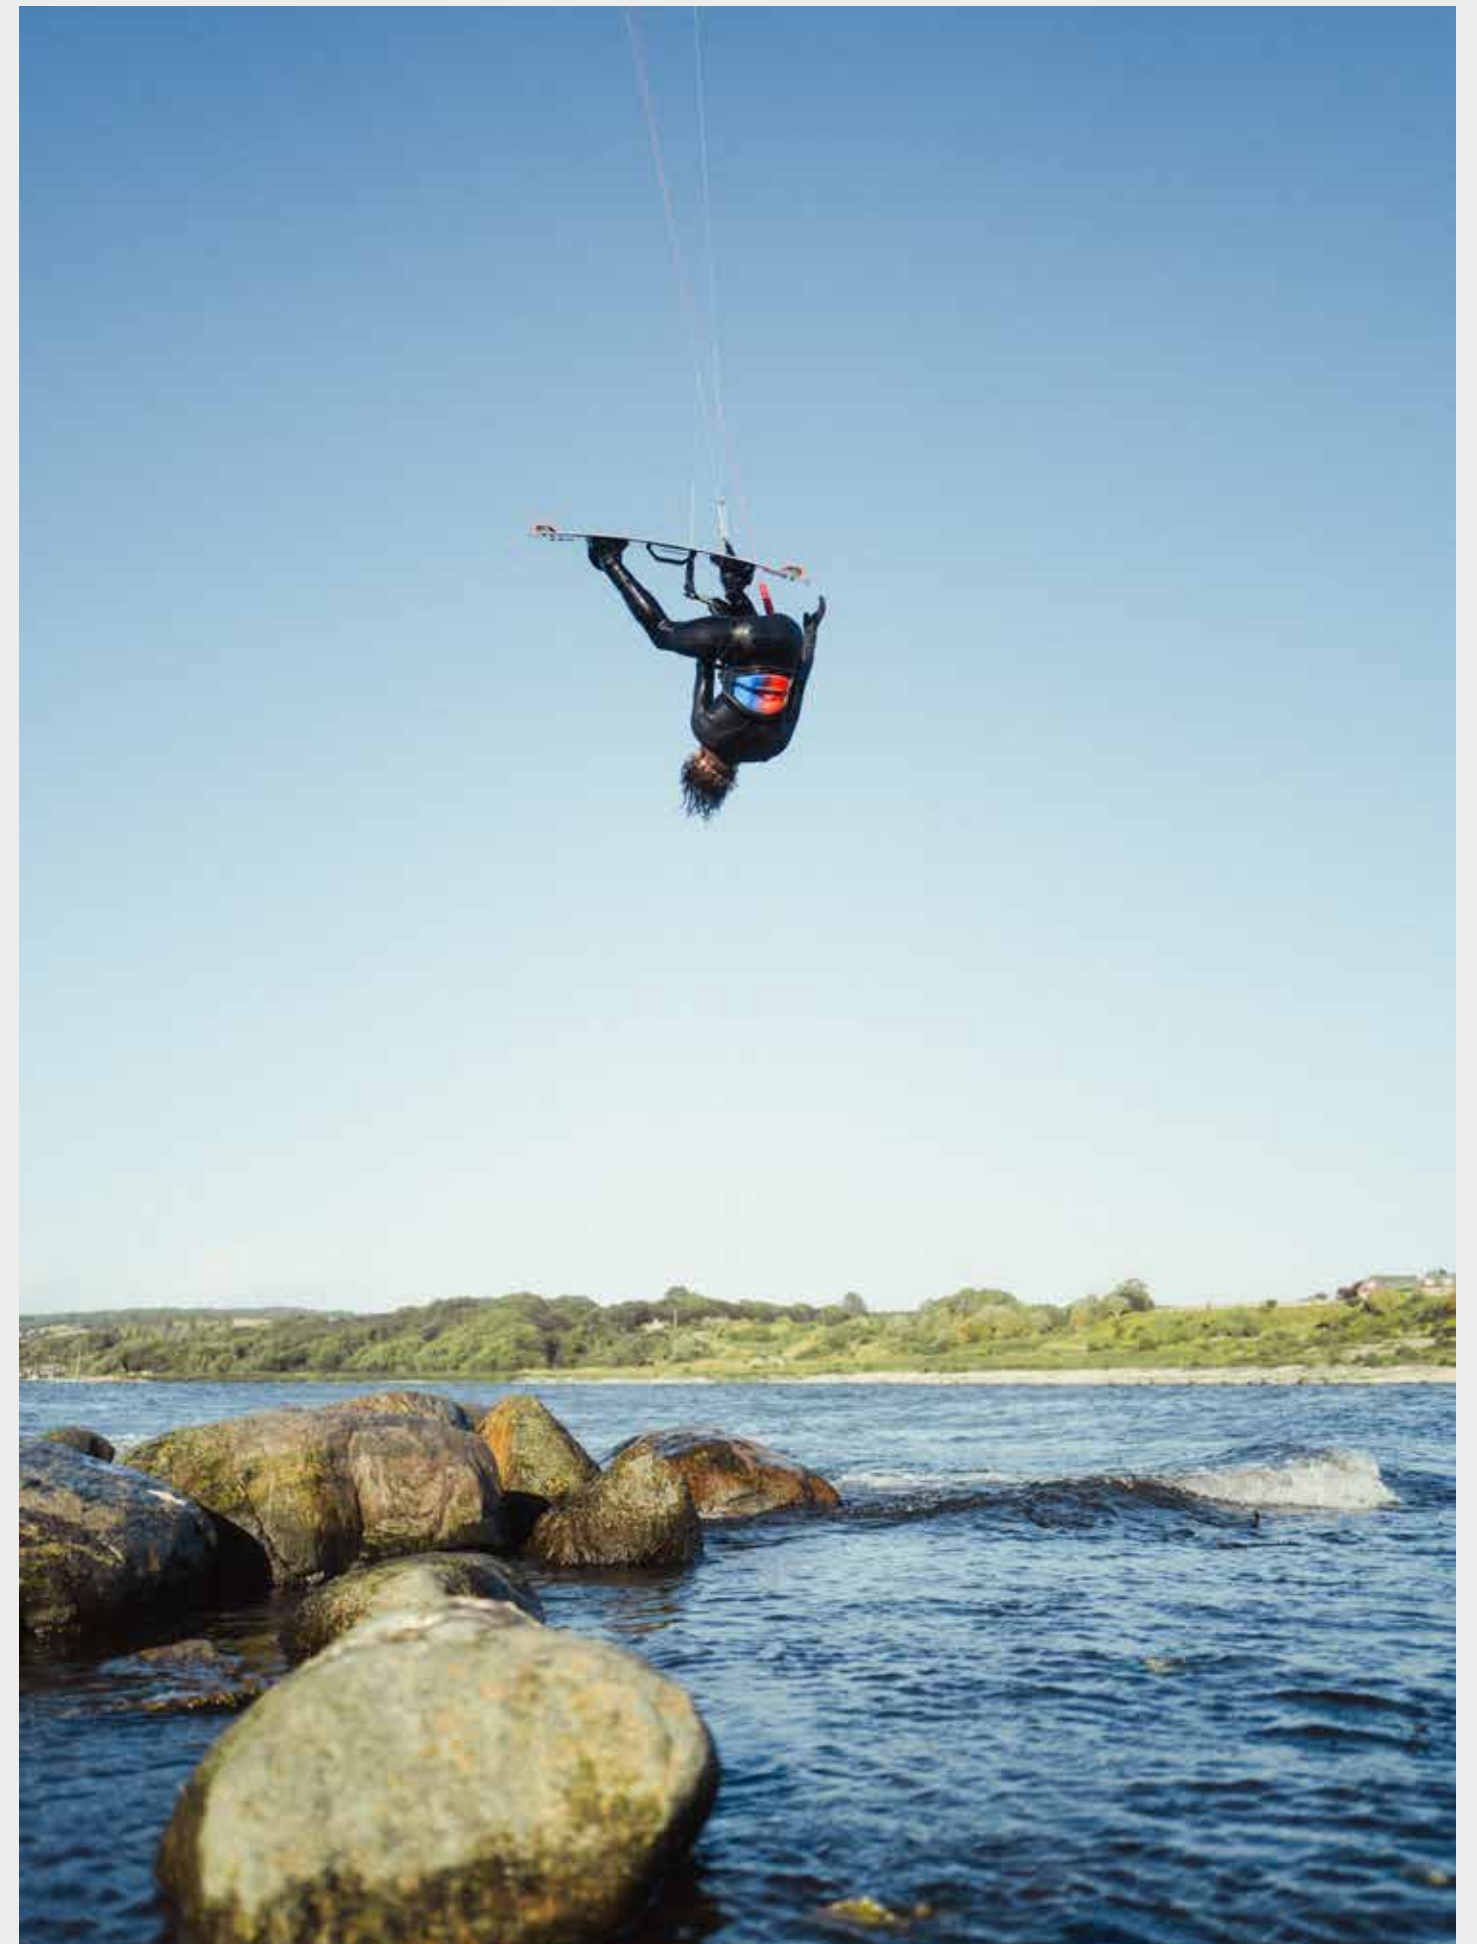

#### OUTER LAYER

Ensures resilient protection

#### THERMAL REBOUND™

Retains and regulates body heat

# PF3

SUSTAIN YOUR RIDE, EMBRACE THE FUTURE

The Prolimit Future Series evolves into its third generation. Completely neoprene-free and crafted from FSC certified NaturePrene2®, this series features linings made from recycled Nylon and PET bottles. Designed for those who seek both performance and sustainability. Equipped with a YKK front zip for easy entry or an asymmetrical front zip for exceptional

on-water performance. Each wetsuit is meticulously triple-glued using water-based glue and packaged in compostable materials. Sustain your ride, embrace the future - experience the perfect fusion of sustainability and performance with the PF3 series.

## PF3 FEATURES

- NaturePrene2
- FSC approved
- Inner plush lining, made out of recycled polyester and replaces Zodiac lining
- Outer lining is made out 88% recycled PET bottles (45 bottles needed for 1 wetsuit)
- Dope Dyed Yarns, saving water in the Dyeing proces by coloring the yarn
- Laminated with non-solvent water based glue, saves 2.698 KG CO2 per wetsuit
- Aqua Alpha water based glue

# VAPOR

DIVE INTO COMFORT AND PERFORMANCE

Experience the pinnacle of technical wetsuits with the Vapor wetsuit. Designed for the modern man who seeks superior performance and unmatched comfort in the water.

Harnessing Thermal Rebound2™ technology, inspired by survival blankets, providing unmatched protection even in the most frigid conditions. The innovative FSC certified NaturePrene2® material is 100% neoprene-free, making the

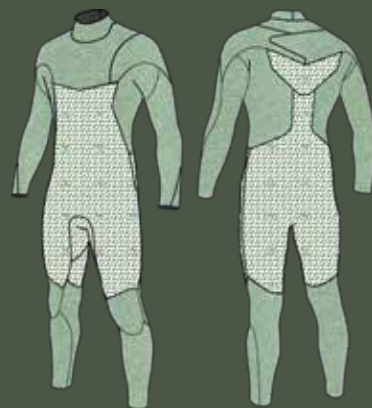

Vapor light, remarkably stretchable, and eco-friendly. Elevate your performance with the Vapor, the highest standard in performance wetsuits.

Engineered with optimized panels and an asymmetrical front zip for exceptional on-water performance. The seams are triple-glued and sealed with a liquid rubber sealant, making them durable, waterproof, and highly stretchable.

# SHIELD

YOUR GATEWAY TO FOILING FREEDOM

Designed to shield you from the impact of the foil and the foil mast, the Shield wetsuits are meticulously engineered to elevate your foiling experience to new heights. Extra reinforcements in the shield zones provide added protection against various impacts. The Airflex 550+ outside lining ensures stretch and durability. Completely neoprene-free and crafted from FSC certified NaturePrene2®.

The Shield is your essential gear for mastering the art of foiling, allowing you to embrace the elements with unmatched precision and performance.

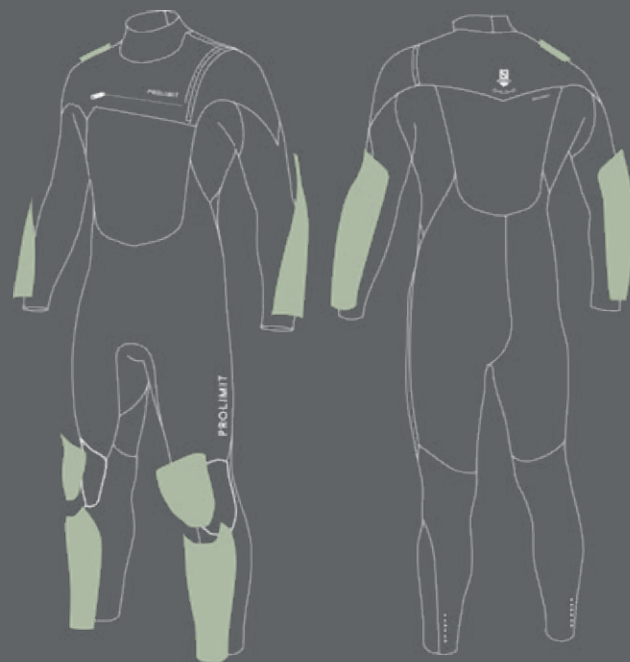

## SHIELD ZONES

**Shoulder:** the right shoulder is extra protected with Fluid neoprene on the outside and additional memory padding on the inside.

**Underarms:** underarms, prone to wear, are shielded with a special lining to provide protection against wear and tear.

**Knees:** the entire knee area is safeguarded with an armored KED kneepad, offering protection against impacts.

**Shinbone:** the entire shinbone area is fortified with an armored layer, shielding against cuts and sharp objects.

# RAIDER

## THE ENTRY LEVEL WETSUIT

The Prolimit Raider wetsuit for men may be the most basic in our collection, but it's packed with technical features to keep you warm during your sessions. Featuring a YKK V-backzip which makes the wetsuit very easy to entry. The water block effectively prevents water ingress. Its triple glued and blind-stitched seams ensure watertightness, adding to your comfort in the water.

### RAIDER FEATURES

- Airflex 350+ limestone neoprene
- Windchill optimized chest and back panel
- Comfort lining
- GBS (triple glued and blind-stitched)
- YKK zipper construction
- CWB - Complete Water Block
- Dura Kneepad
- Aqua Alpha water based glue

PROLIMIT

# OXYGEN

FUEL YOUR RIDE WITH OXYGEN

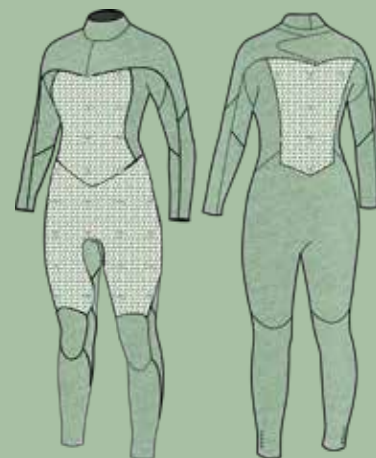

Experience the perfect blend of comfort and performance with the Oxygen steamers. Crafted specially for female riders engaging in activities like kitesurfing, windsurfing, winging and more, this wetsuit is designed to enhance your adventures with its exceptional warmth and insulation.

One of its standout features is the innovative Zodiac2 with Thermal Rebound2™ technology. This cutting-edge technology enhances thermal retention by trapping and reflecting body heat, ensuring you stay warm and comfortable throughout your sessions. Say goodbye to shivers and hello to extended riding time with the Oxygen wetsuit's superior thermal performance.

# FOOTWEAR

## PROTECTION AGAINST SHARP OBJECTS AND COLD

Wide range of boots and shoes. With these boots and shoes, your feet are well protected against sharp objects. Our footwear also ensures that you have a good grip on your board and that your feet stay nice and warm.

# FOOTWEAR TECHNOLOGY

### Our technicians:

- SHAPE:** By adding in more seam shape in the neoprene sock of boots & shoes this does not give a better fit.
- REASON:** The rubber of the sole and sides is cured in our oven on a high temperatures which moulds the boot into the same shape of the last.
- SOLUTION:** We developed our own OCL lasts.

All lasts on the market are not made for active water sports. They made for multi purpose usage; like for wader's boots or fishing purposes, which are static, shaped profiles.

We build the best last possible for active water sports. Together with an orthopedic specialist we analyzed different feet and came up with complete new last designs. In the design we incorporated the stretch of the materials, water influence and the dynamic positions of the feet during active water sport. Your feet are made of 26 bones and 214 ligaments; they need proper support, especially during active water sports.

### LESS WATER ENTRY DUE TO A SNUG AND EXACT FIT

OCL last build boots and shoes will have less water entry. You can hear the difference when filled up with water, while other boots suck in water. Neoprene is stretching in the water even more, all boots and shoes of other brands are sucking in water as boots and shoes are not fitting tightly enough around your feet. Prolimit OCL last build boots are making no noise at all. WHY? Simple, OCL last build boots are leaving no air space in the boot, which can't be filled with water. Shape and Technology, for better function and performance! Noticeable better products. We challenge you, do the test yourself.

### OCL LASTS ARE DIFFERENT!

Most of the Prolimit boots and shoes are built using our unique, Prolimit owned, OCL (Orthopedic Controlled Last). No one in the entire industry made the same effort to go this far! We created the best SHAPE and TECHNOLOGY in a neoprene boot or shoe.

### PROFILED HEEL

- Shaft is more raked back for the Dynamic position.
- The heel of our OCL lasts are much narrower closing nicely around your Achilles tendon and supporting it.

### SWEPT FOOT PROFILE

- Our arch is lower to prevent rolling of the boot around your foot.
- Our sole foot arch is pre shaped to fit the natural position of the foot which is not flat.

Hardshell Pure Construction

### DESCRIPTION

The new hardshell harness in Pure™ material giving elasticity, superior fit, pre moulded shape in a mach vi 3d shaping. Hardshell pure construction, a hardshell harness with some elasticity due to the exclusive pure materials. Due to the unique pure material the harness is lighter (pure is lighter than water and 100% recyclable) and more flexible. In contrast to the hardshell carbon composite construction the pure construction has more torsion flex.

Single Webbing

**DESCRIPTION**  
Best female waist harness ever. Period! Completely new girls waist harness. Neoprene inside to give complete comfort. Great support with plenty of freedom to movement. Redesigned and anatomically drawn on a female cad model with lower rib area. This makes it the most comfortable and stable girls waist harness. Full wrap neoprene edges ensures comfort and no chafe, even without a wetsuit for those summer sessions. The 4 point sticky connection belt offers more mechanical grip than any other harness can deliver

# THE ULTIMATE SOLUTION FOR TRANSPORTING

PATENTED TECHNOLOGY

The Prolimit slider base & slider wheels are the ultimate solution for transporting your board and gear with ease and avoids all limiting factors of the current designs on the market.

Prolimit Slider wheels are mounted under the bag allowing maximum floor height, are always in line with the forward rolling direction (on a normal tapered bag the current wheels will be in an angle) and despite of the rocker of your board they create enough height to avoid destroying your bag on the gravel/tarmac.

Weight is always an issue. Not anymore with the Slider base, extremely light, supported in stiffness with the stiffening bars and easy to slide in the Slider wheels when needed. All Slider wheels equipped boardbags come with a storage bag for the wheels on which instructions on mounting are visibly printed. Organized and easy to find.

Slider wheels are easy to mount by sliding them in the rails and once checking in for your flights, toolless to remove and when you arrive super easy to mount. Made out of Nylon glass reinforced synthetic materials with easy to roll PU Roller Skate Wheels with Bearings.

## WINDSURF BOARDBAG DAY

**FITS IN THE BAG**  
Windsurfboard

Color: Alloy  
Code: 404.03100.000  
Sizes: 235-85  
238-60  
240-75  
240-80  
240-90  
245-65  
250-70  
250-80  
260-80  
270-80  
280-80

## BOOMS & RIG COMPONENTS

### PRO BOOM

Color: Black/Blue/Orange  
Code: 407.71210.030  
Sizes: 140-200, 160-220, 180-240, 200-260

#### FEATURES

- 29mm Diameter with 1.5mm wall thickness
- ROBO EVA grip
- Made from T8 Easton Alloy, 2 piece construction
- Continuous alloy front and back end to optimize stiffness
- Double pin adjustment system for easy adjustment
- 60cm adjustment for maximum sail range coverage
- Axial boom head with integrated skinny adapter

#### DESCRIPTION

High performance boom: developed for maximum strength and functionality. Specific boom profile and monocoque construction.

### ASSAULT BOOM

Color: Black/Orange  
Code: 407.71220.010  
Sizes: 140-200, 160-220, 180-240, 200-260

#### FEATURES

- Specific boom profile constructed from continuous alloy tube
- ROBO EVA grip
- 29mm tubes, T8 alloy in 1.8mm wall thickness
- Alloy back-end
- Double pin adjustment
- 50cm adjustment for maximum sail coverage
- 2 piece construction

#### DESCRIPTION

V-grip. An extruded dual alloy tube for stiffness and comfort in a smaller diameter boom. The tapered and ovalized inside section of the boom is ergonomic and reducing fatigue and arm pump. Featuring a 29mm Diameter with 1.5mm wall thickness made from T8 Easton Alloy. The Assault has 60cm adjustment for maximum sail range coverage. More power and less effort.

## TEAM BOOM

Color: Black/Blue/Orange  
 Code: 407.71231.010  
 Sizes: 145-195, 160-210, 175-225

### FEATURES

Monocoque construction  
 ROBO EVA grip  
 Narrow diameter in the grip area of 26mm (RDG)  
 Manufactured from 1.8mm thick tube, for maximum stiffness  
 Continuous front and back end.  
 Double lever pin adjustment system  
 50cm adjustment for maximum sail coverage  
 2 piece construction  
 Axial boom head with integrated skinny adapter (160)  
 145 RDM Axial Boomhead

### DESCRIPTION

The Team boom is featuring an RDG diameter in the grip area of 26mm. Including our new RDG cup Axial boom head on the 145. On the 160 and 175 our axial boomhead with skinny adapter.

## TCS BOOM

Color: Black/Orange  
 Code: 407.71260.030  
 Sizes: 135-195, 150-210

### FEATURES

Specific boom profile constructed from continuous alloy tube  
 ROBO EVA grip  
 26mm diameter tube, T8 alloy, 1.8mm wall thickness  
 Continuous aluminum front and back end.  
 Double pin adjustment  
 60cm adjustment for maximum sail coverage  
 Axial boom head with RDM  
 RDM Axial Front-end

### DESCRIPTION

They Call me Skinny. Our TCS is a full 26mm diameter boom with a continuous alloy backend. It's a performance driven wave boom. 2 piece Alloy Axial boom. Including our new RDM cup Axial boom head on both sizes.

## CARBON TECH BOOM

Color: Black/Blue/Orange  
 Code: 407.71245.000  
 Sizes: 140-190, 160-220, 180-240

### FEATURES

ROBO EVA grip  
 Specific Boom Profile curve  
 24.5mm reduced diameter grip area for the 140  
 26mm reduced grip area for the other sizes  
 Carbon composite 70%  
 Double pin adjustment  
 Axial boom head with integrated skinny adapter

### DESCRIPTION

Tech Carbon composite booms are stiffer than alloy and resemble the unique looks of the C-100. Full monocoque. 140 is a full RDG 24,5mm boom, other sizes feature a 26mm RDG. Continuous carbon composite front- and backend increase the stiffness.

## CARBON C100 BOOM

Color: Black/Blue/Orange  
 Code: 407.71250.010  
 Sizes: 140-190, 160-220, 180-240

### FEATURES

Specific Boom Profile curve  
 ROBO EVA grip  
 24.5mm reduced diameter grip area for the 140  
 26mm RDG in the other sizes  
 Double pin adjustment  
 Axial boom head with integrated skinny adapter  
 C-100 140/160/180 with wider back end

### DESCRIPTION

The C100 140 is a full RDG 24,5mm boom, other sizes are 26mm RDG diameter. Continuous carbon frontend and carbon backend for the stiffest boom construction available. Wide tailends on the big sizes.

## HARNESS LINES FIXED STANDARD

Code: 404.76031.000  
 Sizes: 16, 18, 20, 22, 24, 26, 28, 30, 32

**DESCRIPTION**  
 Our classic harness line, bomb proof.

## HARNESS LINES FIXED RDG

Code: 404.76041.000  
 Sizes: 16, 18, 20, 22, 24, 26, 28, 30, 32

**DESCRIPTION**  
 Reduced diameter harnesslines for 26mm booms.

## HARNESS LINES VARIO BUCKLE

Code: 404.76065.000  
 Sizes: 22-28, 26-34

## BEACH FLAG

FLAG ONLY

Color: Black/White  
Code: 409.90221.000  
Sizes: 90x375 cm

### DESCRIPTION

Double sided Heavyduty beachflag.  
Flag only.

## BEACH FLAG KIT

FRAME ONLY

Code: 409.90320.010

### DESCRIPTION

Complete kit for beachflag.  
Includes bag, pole and ground pin.

## SAILSTICKER

800X190 MM

Color: Black/White  
Code: 409.90100.000  
Sizes: 800x190 mm

## SAILSTICKER

400X95 MM & 200X47 MM

Color: Black/White  
Code: 409.90104.000  
Sizes: 400x95 mm

Color: Black/White  
Code: 409.90110.000  
Sizes: 200x47 mm

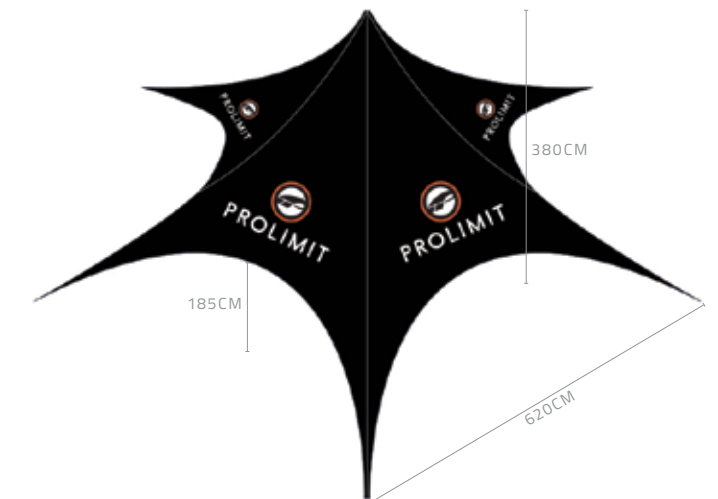

## PROMO FLAG

150X225 CM

Color: Black/White  
Code: 409.90324.000  
Sizes: 150x225 cm

## STAR SHADE TENT

Color: Black  
Code: 409.90505.000  
Sizes: See picture

### DESCRIPTION

Complete starshade tent. Includes pole, pins and bag
